

Chapter26 Portal Services

Consulting Services

Background

Chapter26 is a specialist in Portals & Enterprise Content Management. Chapter26 has decades of experience in providing services to organisations with global and local requirements. Chapter26 has deployed Portal solutions for Internet, Intranet and Extranets for communities ranging from a few hundred to tens of thousands of users.

Many of the deployment have required integration with 'legacy' bespoke systems. This has been achieved through the 'web services enablement' of these back end systems.

The design and creation of compelling User Interfaces for user adoption is an area that Chapter26 has vast experience in the initial or re-launch of a Portal.

Services provided

Chapter26 provides a full life cycle of services for all aspects of Portal design, deployment and integration. These services include:

- Future roadmap planning workshops for Portal initiatives
- Upgrades or re-launching existing Portals
- Intranet, Extranet, Internet, ECM & BPM deployments
- Solution & Technical Architecture of complete Websites
- Creation of a more compelling environment with User Interface upgrades
- Adaptive Portlets, .net & java development
- Performance, content and usability troubleshooting
- Systems Integration including ERP systems, DataWarehouses, Content Management systems, CRM, Reporting and Charting
- Web Services development for communicating with legacy applications
- System Audits

Partnership Experience

"It would be difficult to imagine a better supplier/customer relationship than that which has developed between Chapter26 and English Partnerships."

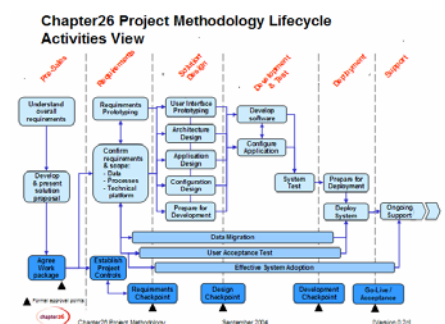

David Wilson Applications Manager, English Partnerships

Skills and Experience

Through years of experience Chapter26 has developed a number of 'best practice' approaches for Portal design and implementation. In addition to these 'best practices' Chapter26 has developed a proven methodology for portal deployment (CPM). CPM is a proven methodology that ensures that all the necessary steps, checks and balances are used in order to ensure rapid and successful portal implementation.

Chapter26 Project Methodology

CPM is a hybrid of a number of established project methodologies such as Prince2, System Management Methodology, RAD and DSDM. CPM uses the most relevant elements of these methodologies to maximize successful deployment and to minimize time, impact and risk.

Leading Portal Architecture & use of Industry Standards

Chapter26 has vast experience in the design and implementation of Enterprise Portals using the market leading technologies . Chapter26 advocates the use of the broadly accepted standards such as HTTP, XML, and SOAP and JSR-168 and WSRP specifications minimises the risk that changing technology will render investment obsolete. Additionally, Chapter26 has extensive development experience in both .net & java.

Client examples – Intranet, Extranet & Internet

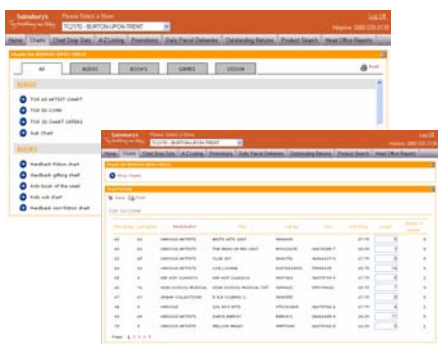

Chapter26 has vast experience in the design, implementation and support of Intranet, Extranet & Internet solutions for organisations from telecommunications to the public sector.

Many of these solutions have innovative designs to create a compelling user experience and a variety of integration approaches for web services enabled applications to legacy systems.
